About the conference theme

Today's world is witnessing rapid digital transformation, and technology has emerged as a key enabler in shaping a sustainable, inclusive, and resilient future. As India advances towards the vision of Viksit Bharat 2047, it is imperative to explore and deliberate on how digital innovation can drive sustainable development and inclusive growth across sectors. Transformative digital practices are redefining businesses, governance, and societal engagement by enhancing efficiency, accessibility, and responsible value creation. DIGI-SUSTAIN 2026 invites academicians, researchers, industry practitioners, policymakers, and development professionals to contribute their insights and scholarly work to the global dialogue on the conference theme: Technology for Viksit Bharat 2047: Digital Innovation, Sustainability, and Inclusive Growth.

About Transformative Digital Practices for a Sustainable Future

Transformative Digital Practices for a Sustainable Future focus on integrating advanced digital technologies with responsible, inclusive, and sustainable development goals. These practices leverage artificial intelligence, data analytics, digital platforms, and emerging technologies to enhance organizational efficiency, foster innovation, and support ethical decision-making. Emphasizing sustainability, digital inclusion, and long-term value creation, transformative digital practices empower businesses, governments, and societies to address pressing challenges, including climate change, resource efficiency, and social equity. By aligning technological innovation with sustainable business models and policy frameworks, these practices play a pivotal role in building resilient institutions, inclusive economies, and a future-ready society.
